

WEBSITE DESIGN SYSTEM

Clinical precision, human warmth.

Tokens, components and rules for the Studio Dental website. Built from the Studio Dental Brand Guide v1.0.

29
colour tokens, light and dark

12
type styles

15
components

WCAG 2.2 AA
contrast on every pairing

Premium and clinical, still human

The website should feel state of the art without feeling cold. Each side of the brand has its own tools.

Clinical, state of the art

- Cool Porcelain and Stone neutrals with generous space
- Evergreen used sparingly, for action and identity
- A strict type scale, tabular prices, hairline structure
- Flat surfaces, three radii, quiet motion

Human and warm

- Real photography of the team and the clinics in daylight
- Champagne and Brass details: eyebrows, rules, highlights
- Bricolage Grotesque's soft, characterful headlines
- Plain, kind copy that explains before it sells

Speak like a good specialist

Clear, calm and specific. Every page says what will happen, what it costs and who will do it.

PRINCIPLE	WRITE	NOT
Explain, don't impress	Root canal treatment removes infection from inside the tooth so it can be kept.	Advanced endodontic therapy with cutting-edge technology.
Specific over superlative	14 dentists across two clinics, including an oral surgeon and a consultant orthodontist.	World-class dentistry from Islamabad's top doctors.
Name the cost	Implants from Rs 150,000. Your final cost is agreed after an examination.	Affordable implants. Contact us for pricing.
Warm, never casual	Meet the team who will look after you.	Get to know us better :) We love smiles!
Formats	Rs 150,000 · +92 329 9961999 · Mon–Fri, 10:00–20:00 · 15 March 2026 · Dr. Aqsa Malik, Clinical Director	Rs.150000 · 03299961999 · 2026-03-15

Semantic colour tokens

Components use semantic tokens only. The Dark theme is for Ink bands such as the hero, footer and feature sections: set `data-theme="dark"` on the section and every component adapts.

LIGHT · DEFAULT

Book a consultation

Porcelain surface, Ink text, Evergreen action.

DARK · INK BANDS

Book a consultation

Ink surface, Porcelain text, Sage action.

Book a consultation

LIGHT / DARK	TOKEN	LIGHT	DARK	USAGE
 	<code>--surface</code>	#F4F6F5	#0E1F1A	Page background (Porcelain). In the dark theme, Ink: used for dark bands such as the hero, footer and feature sections.
 	<code>--surface-raised</code>	FFFFFF	#16302A	Cards, forms, menus and the price table.
 	<code>--surface-sunken</code>	#E8ECEA	#0A1713	Alternate section background (Stone). Use to separate consecutive sections instead of borders.
 	<code>--line</code>	#DDE3E0	#2A443C	Hairlines and card borders. Decorative only; never the sole boundary of a control.
 	<code>--line-strong</code>	#7D8C85	#5E7A70	Input and checkbox borders. Passes 3:1 against surface and surface-raised.
 	<code>--ink</code>	#0E1F1A	#F4F6F5	Headings and body text on every surface. 15.7:1 on surface.
 	<code>--ink-muted</code>	#55655E	#A9BDB3	Secondary text: captions, credentials, metadata. 5.7:1 on surface (light), 8.6:1 (dark).
 	<code>--brand</code>	#17654B	#9FD0B5	Evergreen. Primary buttons, links, active nav, the emblem. As text, on surface, surface-raised and brand-soft.
 	<code>--brand-hover</code>	#10513B	#B8DEC9	Hover and pressed state of brand fills.
 	<code>--on-brand</code>	FFFFFF	#0E1F1A	Text and icons on a brand fill (primary button label). Never use ink-muted here.
 	<code>--brand-500</code>	#2A7A5B	#6FB592	Icons and large decorative accents. As text only at 24px+ or on surface (4.8:1).
 	<code>--brand-soft</code>	#D8ECE0	#1A4435	Mist. Icon wells, selected rows, brand badges (with brand text).
 	<code>--accent</code>	#7A6A4A	#C8B89A	Brass (light) / Champagne (dark). Eyebrows and small details only; never a button or large fill.
 	<code>--accent-fill</code>	#C8B89A	#C8B89A	Champagne as a small fill: the Primary tag in the logo guide, rule accents on Ink. Text on it is ink.
 	<code>--success</code>	#2A7A5B	#8CC0A5	Confirmation text and icons.
 	<code>--warning</code>	#8A5A00	#E0B25C	Warning text and icons, e.g. price may change.
 	<code>--warning-soft</code>	#F6EDDA	#3A2C0F	Background of warning notices.
 	<code>--error</code>	#B3261E	#F2A39C	Form errors and destructive states.
 	<code>--error-soft</code>	#F8E7E5	#3D1714	Background of error notices.
 	<code>--info</code>	#2F5D7C	#9CC3DE	Informational notices.
 	<code>--info-soft</code>	#E3EDF4	#14293A	Background of info notices.
 	<code>--focus</code>	#17654B	#C8B89A	Keyboard focus ring: 2px, offset 2px from the element.

LIGHT / DARK	TOKEN	LIGHT	DARK	USAGE
 	--scrim	rgba(14,31,26,0.55)	rgba(14,31,26,0.65)	Overlay behind text on photos and behind dialogs. Minimum 55% Ink.
 	--raw-ink	#0E1F1A	#0E1F1A	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.
 	--raw-evergreen	#17654B	#17654B	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.
 	--raw-sage	#9FD0B5	#9FD0B5	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.
 	--raw-mist	#D8ECE0	#D8ECE0	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.
 	--raw-porcelain	#F4F6F5	#F4F6F5	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.
 	--raw-champagne	#C8B89A	#C8B89A	Raw brand colour, identical in both themes. For the logo, fixed-colour bands, print and illustration; UI uses the semantic tokens above.

Two faces, one scale

Bricolage Grotesque (500, 600) for headings of 22 px and up; Archivo (400, 500, 600) for everything else. Root font size is 16 px. Mobile sizes are in each usage note.

CLASS	SAMPLE	SIZE / LINE · WEIGHT	USAGE
.display	Dentistry you can trust	64px / 68px · 600	Hero headline only, once per page. Mobile: 42/46.
.h1	Dental implants	48px / 54px · 600	Page title. Mobile: 34/40.
.h2	When an implant is considered	36px / 42px · 600	Section title. Mobile: 28/34.
.h3	A single missing tooth	28px / 34px · 600	Sub-section and card-group title. Mobile: 24/30.
.h4	Dr. Aqsa Malik	22px / 28px · 500	Card titles, doctor names. Mobile: 20/26. Smallest size for Bricolage.
.lead	An implant replaces the root of a missing tooth.	20px / 32px · 400	Intro paragraph under a page or section title. Mobile: 18/28.
.body	The teeth on either side are not drilled or reshaped.	16px / 26px · 400	Running text. Max 68 characters per line. Never smaller on mobile.
.body-strong	Emphasis inside body, table row labels	16px / 26px · 600	Emphasis inside body, table row labels.
.small	Captions, notes, credentials, footer text	14px / 22px · 400	Captions, notes, credentials, footer text.
.label	Book a consultation	16px / 20px · 600	Buttons, nav links, form labels.
.eyebrow	DHA PHASE II	12px / 16px · 600	Uppercase section kicker in accent colour. Always paired with a heading.
.numeric	Rs 150,000	16px / 24px · 500	Prices and times in tables; enable tabular figures.

Spacing, radius, elevation, layout

A 4 px spacing scale, three radii plus pill, three shadow levels and three content widths. Nothing outside these values.

TOKEN	VALUE	SCALE	USAGE
--space-1	4px		Icon-to-label gap inside compact elements.
--space-2	8px		Gap between related inline items (badges, icon + text).
--space-3	12px		Label to input; tight stacks.
--space-4	16px		Mobile page gutter; gap inside cards.
--space-5	24px		Card padding (mobile); grid gutter.
--space-6	32px		Card padding (desktop); gap between heading block and content.
--space-7	48px		Between groups inside a section.
--space-8	64px		Section padding (mobile).
--space-9	96px		Section padding (desktop).
--space-10	128px		Hero padding (desktop).

RADIUS

--radius-sm

8px

Inputs, small tags, table cells.

--radius-md

16px

Cards, notices, images inside cards.

--radius-lg

24px

Feature images and large panels. The arch frame is radius-pill on the top corners + radius-lg at the bottom.

--radius-pill

999px

Buttons, badges, chips.

ELEVATION

--shadow-1

Resting cards on sunken backgrounds.

--shadow-2

Hovered cards, sticky header after scroll, dropdowns.

--shadow-3

Dialogs, the mobile menu sheet.

LAYOUT

TOKEN	VALUE	USAGE
--container-text	720px	Articles, service body copy, forms.
--container	1200px	Standard page content width.
--container-wide	1360px	Hero and full-bleed image grids.
--bp-md	768px	Tablet breakpoint: two-column grids start.
--bp-lg	1024px	Desktop breakpoint: full nav shows.

TOKEN	VALUE	USAGE
--tap-target	44px	Minimum height and width of any tappable element.

Real rooms, real people, daylight

The clinic's own photography only. Portraits on the charcoal backdrop in black scrubs at 4:5; interiors in natural light; one arch frame per view.

Portrait in the arch frame

Interior · the lounge in daylight

Care · clinicians at work

Fifteen building blocks

Shown with real Studio Dental content. The reference implementation is React 18 (`window.StudioDental`); the markup and `sd-` classes below are framework-neutral.

BRAND

Logo

StudioDental.Logo

The Studio Dental wordmark with the arch emblem, rendered as live type so it stays sharp and themeable.

- `variant` : `horizontal` (default, header and footer), `stacked` (square spaces, signage), `emblem` (favicon-sized spaces, avatars).
- `tone` : `brand` on Porcelain/White, `ink` for one-colour print, `inverse` on Ink or Evergreen.
- `descriptor` : `"Clinic"` by default; `"Clinic · Islamabad"` in the footer; `null` in the site header and below 140 px wide.
- `size` is the emblem height in px. Keep clear space equal to the emblem's inner tooth on every side. Minimum 24 px.
- Never recolour to mint, add effects, or re-type "Studio Dental" in another font.

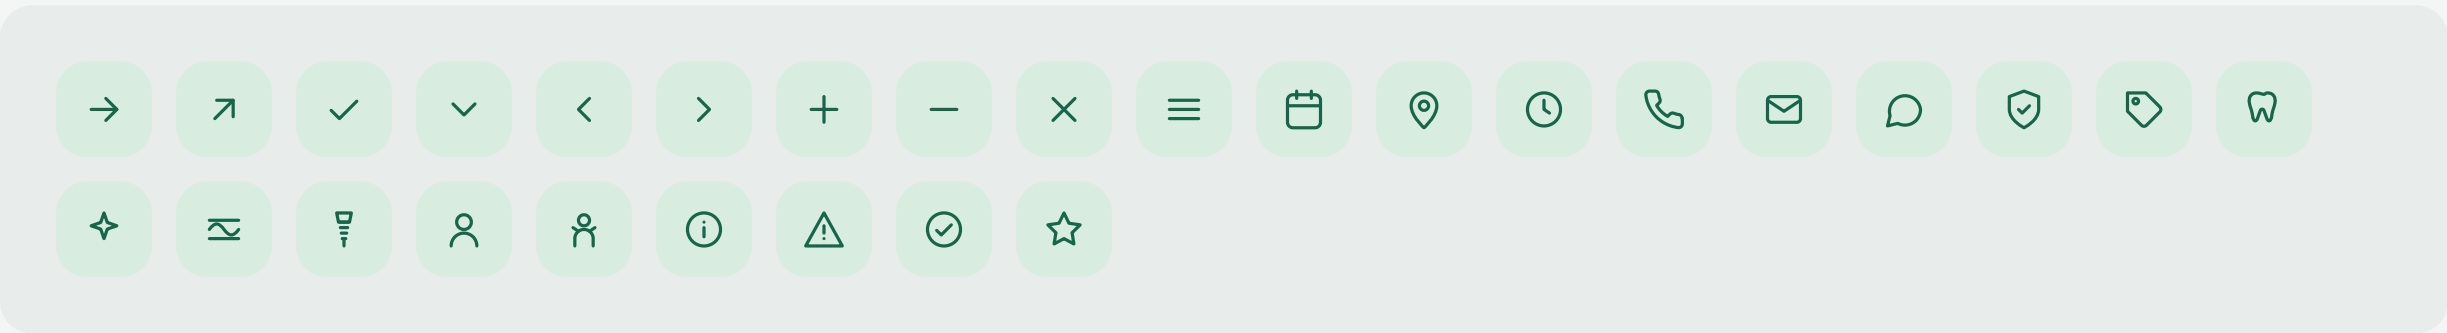

Icon

StudioDental.Icon

Line icons on a 24 px grid, 1.75 px stroke, round caps, drawn in `currentColor`.

- Pass `label` when the icon carries meaning on its own (icon-only button); otherwise it is hidden from screen readers.
- In cards, sit icons in an Evergreen-on-Mist `.sd-icon-well` (48 px, radius-md).
- Source set is Lucide; add new icons in the same style only. Never use emoji.

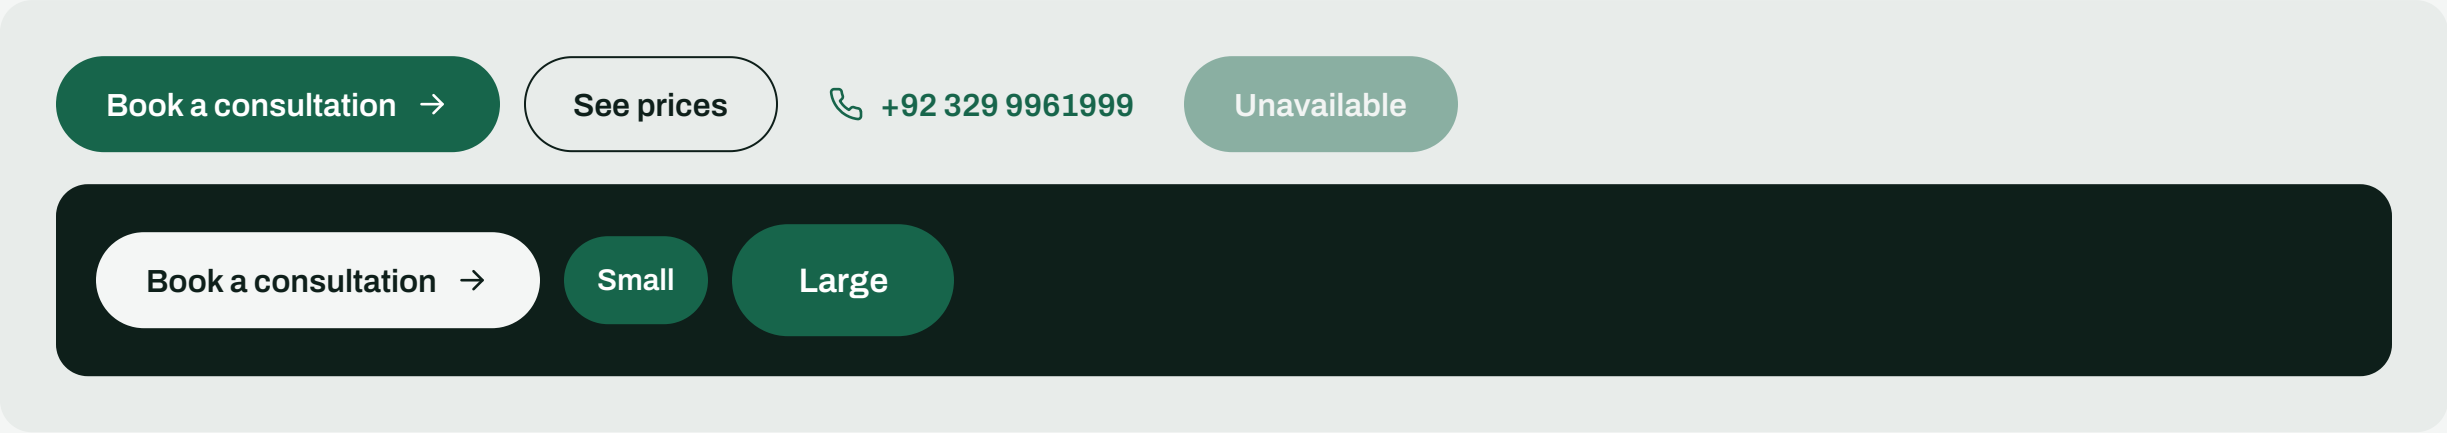

Button

StudioDental.Button

Pill buttons for actions; the label always starts with a verb.

- `primary` (Evergreen): one per view, the main booking action. `secondary` (Ink outline): alternatives such as See prices. `ghost` : tertiary and inline actions. `inverse` : primary action on Ink bands and photos.
- Sizes: `sm` 44 px (header, cards), `md` 48 px (default), `lg` 56 px (hero, mobile sticky bar). Every size meets the 44 px tap target.
- `href` renders a link; otherwise a `<button type="button">`. `icon` trails (usually `arrow-right`), `iconLeading` leads (`phone`).
- On mobile, stack buttons full-width (`fullWidth`) rather than leaving uneven widths.

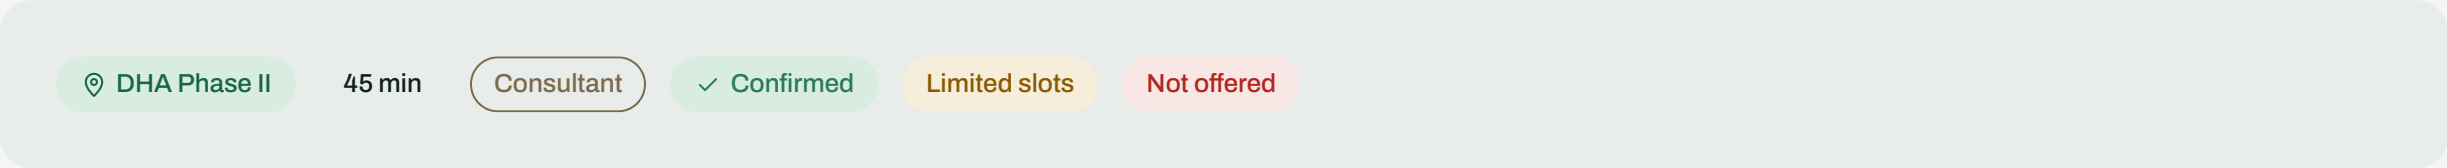

Badge

StudioDental.Badge

A short, factual label: a branch, a duration, a status.

- `brand` with `map-pin` for branch names; `neutral` for durations and counts; `accent` (Brass outline) for seniority such as Consultant; `success` , `warning` , `error` for states only.
- One to three words. Never decorative, never more than two badges per card.

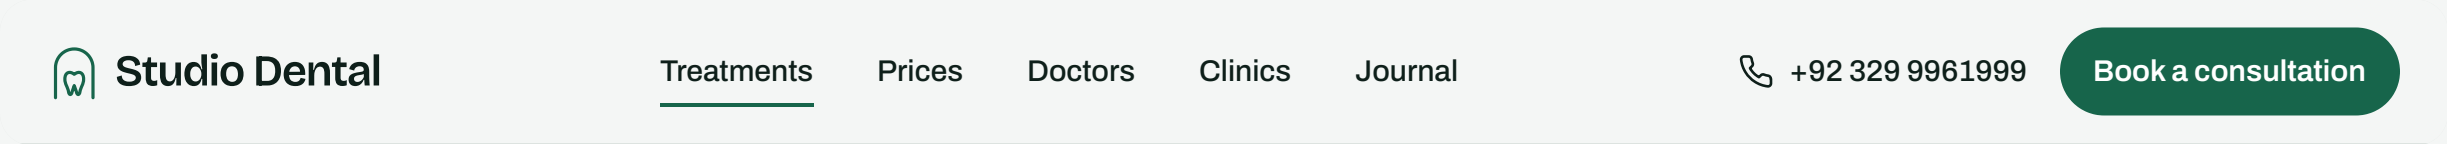

PAGE STRUCTURE

Site header

StudioDental.SiteHeader

The site's top bar: logo, main navigation, phone and the booking button, with a mobile menu sheet.

- Light by default (Porcelain); `inverse` only over the Ink hero band. Never a mint or gradient bar.
- Nav labels match page titles exactly: Treatments, Prices, Doctors, Clinics, Journal.
- Below 1024 px the nav collapses into the menu sheet, which ends with a full-width booking button.

Section header

StudioDental.SectionHeader

Opens every page section: eyebrow, one heading, optional lead, optional action on the right.

- Always left-aligned inside content (`align="center"` only for a short closing CTA band).
- Eyebrow names the topic in 1–3 words (Treatments, DHA Phase II); the heading says what the reader gets.
- `level` sets h1/h2/h3; one h1 per page.

TREATMENTS

Everything your smile needs, in one place

From check-ups and hygiene to implants and aligners. Every treatment is priced for both clinics.

All treatments →

Stat

StudioDental.Stat

A single, verifiable figure with its label.

- Render the final value as text. Never animate a count-up from zero: crawlers and slow devices read "0 clinics".
- Figures must be agreed with the clinic (one experience figure site-wide). Use `inverse` on Ink bands.

17 years

of clinical experience

14 dentists

general to specialist

2 clinics

DHA Phase II and F-7 Markaz

CONTENT

Service card

StudioDental.ServiceCard

A treatment summary linking to its page, with an optional starting price.

- `icon` from the Icon set, `title` as the treatment's patient-facing name, `description` in one sentence (max ~110 characters) so cards align.
- `price` reads "From Rs 150,000"; omit when a price depends entirely on assessment.
- Lay out in a 3-column grid on desktop, 2 on tablet, 1 on mobile; fill rows (6 or 9 cards, not 5).

Dental implants

A fixed replacement for a missing tooth that leaves the neighbouring teeth untouched.

From Rs 150,000

Learn more →

Teeth straightening

Braces and clear aligners for teenagers and adults.

From Rs 180,000

Learn more →

Children's dentistry

Unhurried first visits, check-ups and fillings for children.

Read more →

Doctor card

StudioDental.DoctorCard

A doctor's photo, full name, role, credentials and branch.

- Always full name with title (Dr. Aqsa Malik) and a role. A doctor without a confirmed role or photo is not published yet.
- Without `photo` the card shows initials on Ink: use only while photography is pending.
- `arch` puts the photo in the arch frame (feature placements, the team page lead). Portraits are 4:5 on the charcoal backdrop.

Dr. Yousaf Kamal

Consultant dental surgeon

BDS, MSc (King's College London), DDPH (RCS England)

 DHA Phase II

Dr. Aqsa Malik

Clinical Director

BDS

 DHA Phase II

Dr. Amna Hassan

Oral and maxillofacial surgeon, implantologist

BDS, FCPS (OMFS), MFDRCSI

 DHA Phase II

Price table

StudioDental.PriceTable

Treatment prices for both clinics, side by side, with tabular figures.

- `rows[].prices` follows `columns` order; `null` shows "Not offered" in muted text.
- Always include the `note` explaining that the final cost is agreed after an examination.
- Format prices as `Rs 150,000` . On phones the table scrolls horizontally inside its card rather than squashing.

Dental implants		
TREATMENT	DHA PHASE II	F-7 MARKAZ
Dental implant, category 1	Rs 200,000	Not offered
Dental implant, category 2 Brand and warranty explained at consultation	Rs 150,000	Not offered
Dental implant	Not offered	Rs 200,000
Implant crown	Rs 50,000	Rs 50,000
Final cost is agreed after an examination. Some cases need a bone graft or build-up first; we will tell you before any work begins.		

Clinic card

StudioDental.ClinicCard

A branch's address, phone, email, opening hours and actions.

- Hours as rows ({days, time}), 24-hour times with en dashes (10:00–20:00); include closed days.
- mapHref must link to the branch's exact Google Business Profile, not a generic search.
- Use one card per branch, side by side on desktop.

Accordion

StudioDental.Accordion

Expandable questions and answers, used for FAQs on treatment pages.

- Write questions the way patients ask them; answer in two or three sentences.
- Pair with FAQPage structured data on the page. Only one item open at a time.

Does an implant hurt?

—

The area is fully numbed with local anaesthetic before anything begins. Most patients describe mild soreness for a few days afterwards, managed with ordinary pain relief.

How long does the whole treatment take?

+

Can I pay in instalments?

+

Field

StudioDental.Field

Labelled text input, email, phone, select or textarea with hint and error states.

- Label always visible above the control (no placeholder-only labels). Optional fields are marked "(optional)"; required ones are not starred.
- Errors say what to do: "Enter an email address like name@example.com".
- Controls are 48 px tall with a `line-strong` border (3:1). Use `autoComplete` values (`name` , `tel` , `email`).

⚠ Enter an email address like name@example.com

What would you like help with? (optional)

Checkbox

StudioDental.Checkbox

A custom-styled checkbox with a clickable label, for consent and preferences.

- Consent boxes are unticked by default except where the user has already agreed.
- Keep marketing consent separate from the privacy agreement.

☒ I agree to the privacy policy

☐ Send me reminders for check-ups by WhatsApp

Notice

StudioDental.Notice

An inline message for information, warnings, confirmations and errors.

- `info` for helpful facts (free consultation), `warning` for caveats (prices may change), `success` after a form is sent, `error` when something failed, with the next step.
- Body text stays Ink for readability; tone colours only the icon, title and background.

ⓘ

Your first consultation is free

Assessment and treatment planning at either clinic.

We could not send your request. Check your connection and try again, or call +92 329 9961999.

Applying the system to the website

Map the tokens once in the global stylesheet, then use only these values. No arbitrary hex values such as `bg - [#EEF6EC]` anywhere in the codebase.

MIGRATION FROM THE CURRENT SITE

CURRENT SITE	REPLACE WITH
<code>#5FB979</code> fills, text, borders	<code>brand</code> fills; <code>brand</code> text; <code>line</code> borders
<code>#EEF6EC</code> section background	<code>surface</code> / <code>surface-sunken</code> alternating
<code>#123420</code> headings	<code>ink</code>
<code>#4F6557</code> body text	<code>ink-muted</code> for secondary, <code>ink</code> for body
<code>#256B3C</code>	<code>brand</code>
Green gradients (mission card, header, hero overlay)	Solid <code>surface-raised</code> , <code>ink</code> band, or <code>scrim</code> over photo
800 weight Bricolage	600
18 px root + fractional sizes (10.8, 14.76 px...)	16 px root + the type styles above
8 radii	<code>radius-sm</code> / <code>md</code> / <code>lg</code> / <code>pill</code>

Built in, not added later

Interaction

- Every tappable element is at least 44 × 44 px, including phone and map links
- Visible 2 px focus ring, offset 2 px, on every interactive element
- Motion 160–240 ms; respect `prefers-reduced-motion`
- Content is visible at rest: no count-up from zero, no sections hidden until scrolled

Content

- Text meets 4.5:1 contrast (3:1 at 24 px and up) in both themes
- One h1 per page, headings in order
- Form fields have visible labels; errors explain the fix
- Meaningful images have alt text; decorative icons are hidden
