

Dentistry you can trust.

The essentials of how Studio Dental looks, speaks and shows up, across the website, the two clinics and everything patients hold in their hands.

01 · FOUNDATION

Who we are

Everything on this page is the source for the pages that follow. When a design or copy decision is unclear, come back here.

POSITIONING

For families and professionals in Islamabad who want care they can rely on for decades, Studio Dental is a specialist-led clinic that plans every treatment for the long term and prices it openly, at DHA Phase II and F-7 Markaz.

MISSION

Teeth are meant to last a lifetime. We treat early, conserve what is natural and explain everything before it happens.

PROMISE (TAGLINE)

Dentistry you can trust. Used as the sign-off line; never altered or combined with another slogan.

VALUE

Treat the cause

We plan around how a tooth will hold up over years, not how it looks today.

VALUE

Keep what's yours

The most conservative option that does the job is the one we recommend.

VALUE

Cost before care

Prices are published for both branches and agreed before treatment starts.

VALUE

Unhurried care

Time to ask questions, especially for children and first visits.

PERSONALITY

- Precise
- Calm
- Warm
- Advanced

Essence: clinical precision, human warmth. State-of-the-art equipment and method, delivered by people who take time to explain. Confident without boasting, kind without being casual.

WHO WE SERVE

Families

Check-ups, hygiene and children's dentistry

Professionals

Aesthetic, aligners and efficient appointments

Complex cases

Implants, surgery and full restorations

Wordmark and emblem

The website wordmark stays, refined for calm and legibility. The arch emblem is adopted and pairs with it for small spaces: favicon, social avatar, signage and uniforms.

CURRENT WORDMARK

Studio Dental
CLINIC

800 weight reads heavy and playful; loose descriptor with no fixed relationship to the name.

REFINED WORDMARK

Studio Dental
CLINIC · ISLAMABAD

Bricolage 600 at –3% tracking. Descriptor in Archivo 500, +34% tracking, cap height set to 23% of the name. "Islamabad" can be dropped where space is tight.

EMBLEM · ARCH

Primary

A tooth held inside an arch. The arch echoes the arched mirrors in the clinic lounge and reads as a doorway: a studio you walk into.

EXPLORED · SEAL (NOT ADOPTED)

The tooth in a circle. Simpler, more conventional; a fallback if the client prefers a classic medical mark.

EXPLORED · MONOGRAM (NOT ADOPTED)

Lower-case "sd" from the wordmark in a soft square. Works as an app icon, less descriptive of dentistry.

LOCKUPS AND COLOUR VERSIONS

Studio Dental
CLINIC

Primary · Horizontal on Porcelain

Studio Dental
CLINIC

Reversed · on Evergreen

Studio Dental
CLINIC

Stacked · on Ink, Champagne emblem

Studio Dental
CLINIC

One-colour · Ink, for print and fax

CLEAR SPACE AND MINIMUM SIZE

Studio
Dental

- Clear space on all sides = height of the emblem's inner tooth.
- Wordmark minimum: 96 px wide on screen, 25 mm in print.
- Emblem minimum: 16 px (favicon), 6 mm in print.
- Drop the descriptor below 140 px wide.

DON'T

- × Recolour in bright mint or gradients
- × Stretch, skew or outline the wordmark
- × Place on busy photos without a scrim
- × Add effects: shadows, glows, 3D
- × Rearrange emblem and name
- × Re-type the name in another font

Evergreen on cool porcelain

Cool, clean neutrals give the clinical base; deep evergreen gives identity; champagne adds warmth in small doses. Neutrals carry most of every layout; evergreen marks action and identity; champagne is a detail, never a fill for large areas.

Speak like a good specialist

Clear, calm and specific. We explain what will happen, what it costs and who will do it. Plain British-leaning English, as used across Pakistan's private healthcare.

Explain, don't impress

Describe the treatment in the patient's words first, the clinical term second.

Advanced endodontic therapy with cutting-edge technology.

Root canal treatment removes infection from inside the tooth so it can be kept.

Specific over superlative

Facts build trust; adjectives cost it. Every claim must be checkable.

World-class dentistry from Islamabad's top doctors.

14 dentists across two clinics, including an oral surgeon and a consultant orthodontist.

Name the cost

Give the price or a range, and say what can change it.

Affordable implants. Contact us for pricing.

Implants from Rs 150,000. Your final cost is agreed after an examination.

Warm, never casual

Kind and human, without emoji, jokes or exclamation marks.

Get to know us better :) We love smiles!

Meet the team who will look after you, and what they do outside the clinic.

WORDS WE USE

consultation · check-up · treatment plan · clinic · dentist · specialist · fixed price · examination · comfortable · appointment

WORDS WE AVOID

world-class · best · top · painless · guaranteed · cheap · perfect smile · revolutionary · miracle

Medical claims, credentials and before/after results are checked against the doctor's own registration and records before they are published.

Real rooms, real people, daylight

Photography shows the actual clinics and the actual team. No stock smiles. Every example below is the clinic's own photography.

Portrait · Charcoal backdrop, black scrubs, arms relaxed. Same lens and height for every doctor.

Interior · Treatment room or lounge in natural light. Wide, calm, level horizon; nobody posing.

Detail · Instruments, materials, the etched door. Shallow depth, no blood.

Care · Hands, conversation, a child in the chair with a parent close.

GRADE

Cool-neutral white balance, lifted shadows, gently reduced saturation. Greens in the room should read as the brand's evergreen, never neon.

GRAPHIC DEVICE · THE ARCH

Portraits and feature images may sit in an arch frame taken from the emblem. One arch per view; everything else uses a 20 px radius.

AVOID

Stock models, extreme close-ups of teeth, visible procedures, green colour overlays, text over busy photos without an Ink scrim of 55% or more.

ICONS

Line icons, 24 px grid, 1.75 px stroke, round caps. Lucide as the source set. Evergreen in a Mist well.

The brand at work

Reference layouts for the touchpoints patients see most. The website direction here is what the design system and code fixes will implement.
